Her early discoveries on the islands led to a comprehensive round-the-clock skincare regimen and played a pivotal role in the development of every product from cosmetics to skincare.

Today, SeneGence products are formulated with proprietary complexes and formulas that help improve skin from head to toe dramatically, 24-hours a day. Finding Your Undertone

Take a close look at the veins on the underside of your wrist.

Are your veins blue or purple? If so, then you are cool and will look good in MakeSense® shades with pink or red undertones.

Are your veins green or olive? If yes, you are warm and will look great in MakeSense shades with yellow undertones.

An alternative way to find your undertone is by taking a picture in both a cool-coloured shirt (such as gray) and a warm-coloured shirt (such as yellow). Whichever you feel you look the best in is likely your undertone.

Can't tell? Then you are neutral.
